- **AI-ML**
  September – November 2022
  Virtual internship Supported by APSCHE and **AWS** academy.

Projects

Accident detection system using CNN&LSTM network
Duration: 2 months
Team Size: 5
Description: The proposed system utilizes CCTV cameras and deep learning convolutional neural networks to quickly and accurately detect accidents on highways. This technology aims to expedite emergency response, potentially saving lives by minimizing response time for accident victims. I did these project as a team lead.

Certification

- **SQL & Relational Databases 101 (2023) – IBM, Cognitive Class.**
